

## Skillsoft Select & Skillsoft Select Plus

### Premium solutions for the SMB market

Skillsoft has created two content bundles that will provide your employees with the training and development they need to provide maximum value to your business.

Small-to-medium sized businesses (SMB) need training to build strong management and technical skills. They need on-demand training that is always accessible and easy to implement and use with limited training staff. And, the solution needs to fit into a smaller budget, with the flexibility to change as the business changes and grows.

To meet these demands, Skillsoft offers two options containing our most popular assets: Skillsoft Select and Skillsoft Select Plus. Companies may choose from Office 2013, Office 2010 or Office 2007 versions. In addition, these options come bundled with Skillport®, Skillsoft's cloud-based learning management system. Or, if you prefer, you can use a third-party learning management system.

Our staff was so hungry for learning. When you provide the right tool at the right time, your people will use it.

The screenshot displays the Microsoft Excel 2010 interface with a PivotTable titled "Product Sales - 2009". The PivotTable shows data for various salespersons across different regions and products, with columns for Quarter, Salesperson, Region, Product, Net Sales, 2008, and Change. A Skillsoft training overlay is present, featuring a "Try It" box with instructions to publish workbook data to a SharePoint site and a "Show Me" button. Below this, a "Step 1 of 5" box indicates the first step: "1. Select the File tab".
